Node.js, Express, JavaScript, jQuery, React.js, React Native, GIT, Github, MongoDB, MySQL, Handlebars, HTML, CSS, Bootstrap, Media Queries, APIs, JSON, REST, AJAX, the command line, computer science fundamentals

EXPERIENCE

Engage (Atlanta, GA)   2018
NodeJS and MongoDB Developer
- Engage provides the best rewards for customers and the best data for companies. Using short, fun surveys, created and sent by the business, it gathers crucial feedback from the customer and gives them a fantastic reward for their time and info.
- I worked on a team of four, and I was responsible for creating the routes for the customers and the companies. As well as setting up the structure for the Mongo database.

VolunteerNOW (Atlanta, GA)
2017
NodeJS and MySQL Developer
- VolunteerNOW seeks to be the place to find opportunities to serve your community. Organizations in the community post upcoming events and their needs for volunteers. Members of the community search these events to match their interests, talents and time availability. Members also track their service record and check their calendar for upcoming commitments. Organizations manage their volunteers, training and outreach. New organizations can jumpstart their integration into the community. Join now and start volunteering!
- I worked on a team of four, and I was responsible for creating the routes for the volunteers and the Organizations as well as the html rousts for the user flow

WeCoin (Atlanta, GA)   2017
JavaScript Developer
- A web app that allows users to to find merchants near them that accept bitcoin as payment.

- I worked on a team, and I was responsible for using the Google Maps API` to connect the location information from the CoinMap API and display corresponding icons on the map.
- https://github.com/pperreiah/project-bitcoin
- https://pperreiah.github.io/project-bitcoin/

LIRI (Atlanta, GA)   2017
Back-End Developer
- command line node app to return tweets, song information or movie information.
- App logs commands
- Node.js, NPM Packages: Request, Spotify, Twitter
- https://github.com/andrejarboe/liri-node-app

Local Weather App (Atlanta, GA)   2017
Front-End Developer
- A web app that allows users to see their local weather summary temperature, and an icon to match.
- I was able to use the freecodecamp.com weather api and the html5 geolocation api to pull in a the users location and match it with their current weather. Users can also toggle between fahrenheit and celsius. The site works on mobile and desktop.

Random Quotes Generator (Atlanta, GA)   2017
Front-End Developer
- A web app that allows users press a button and receive a random quote.
- I was able to use the forismatic.com api to pull in a random quote whenever the user presses a button. I was also able to integrate a twitter button that allows that user to tweet out the quote and the author from their profile. The site works on mobile and desktop.
